The first shoe factory in New England to fun By electricity exclusively will be that of Packard & Grover, of Brookton. A 25 horsepower electric motor is now being placed in position there. Power will be furnished from the central electric lighting station, and all the machinery in the shop, which is a large one, will she operated from that plant. The cost is estimated at much less than the expense of running an engine and boiler, without counting the cost of them.

- Scene: The Admiralty.-Inventor: "I have are built that way; in fact, many of them go to the bottom without the trouble of firing at them. Good morning."

Sarah Bernhardt is said to have fallen into evil ways in London. Instead of dressing herself gorgeously as she used to, she sits all day in a greasy wrapper playing besique, her partner glways being poor Dantals, with whom she has started a second honeymoon; and, what is worse, her growing intemperance threatens to deprive On Pages -- 1. the world of its greatest artists. Raw brandy has become her drink, and she uses it, according to those who act with her, librally to support her through exhaustive performances, taking a little every time she leaves the stage.

The question of diminishing the consumption of spirits is being seriously discussed in Brassels. A newspaper published in a poor part of Flanders states that the daily consumption of a working man-not a drunkard-there includes at 5.50 a.m. a "worm-killer," at Ba.m. an "eye-opener," at 11 a.m. a "whip," at 2 p.m. a "digester," at •5 p.m. a "soldier," and at 7.30 p.m. a "finisher." His regular yearly expenditure for drams, without counting extra libations on fastive occasions, amounts to 219fr.—a-rather important item in a family budget of from 800fr. to 1,200fr. a year.

The following proposition has been made b d professor and teacher of the Royal Photographic School of Vienna. It is to apply photo-Trapby in deciding races in which the result may be doubtful. In place of the decision of the judge, who may err sometimes, it is proposed to accept the unfailing dictum of the camera. For this phrose six cameras are to be placed in line at the winning-post, a few feet spart, and directed towards the race-course, which may be exposed simpltaneously by the agency of electricity. As Book as the leading horse reaches the first camera all/the cameras are exposed. The plates may be developed in from two to three minutes, and the result will unmistakably show which horse is the actual winner.

Of the invention of "cures" there is mpparently, no end. We are accustomed homosopathy and to hydropathy. Pelopathy, or treatment by means of mud baths, is not quite so familiar. Razopathy, or the grapecure, is more favoured in vine-producing countries than it is in England. Glossopathy is now added to the list. It is the invention of an American physician, who, no doubt, has read the parable of Dives and Lazarus, and who professes to have personally observed the good effects which dogs can produce upon suffering humanity by applying their tongues to wounds and sores. The "paperpowder" possesses the additional advantages of Société Francise des Charbonnages du Tonkin not feeling the barrel, while it produces scarcely sny swoke and causes a very slight recoil. The Hongkong Righ Level Tramways Company, question of its adoption for the Line regiments is now under consideration, and there is every East Borneo Planting Company, Limited-\$48 reason to believe that the Belgian military authorities will decide in its favour.

The experiments that were made with the new magazine rifle at Aldersbot recently appear to have been decidedly satisfactory. Whether this weapon really is "the best rifle in exintence" cannot yet be as ertained; but now that good form of cartridge has been devised, warranted not to jam and always to go off when required much may be hoped for from it. The targets consisted of dommios arranged in ranks at 2,000, 2,400, and 2,800 yards respectively, and the percentage of hits was 48 in the first case, 29 in the second, and 16 in the third. There is something very cerie about this long distance shooting. When a man who probably can only just be seen by a glass can be shot at a distance of a mile and a half with a rifle bullet war is indeed becoming scientific. The penetrating power of the new bullet seems to be very dreadful; and it is likely that in future wars there will be a much increased proportion of deadly wounds.

The following story is told by the Austrian papers, and is amusing society in Vienna. A few weeks ago a man dressed in Tyrolese costume entered the shop of the principal barber in Innsbruck, sat down in a chair, and made a sign that he desired to be shaved. The proprietor of the es ablishment is patronized by all the civic big. tional Jopps reclining on the velvet plack that was sacred to local officials, he approached the daring intruder and bluntly told him, "We don't serve peasants here; this, is a saloon for gentlemen." The stranger rose with a smile. Very well," he said : "but oblige me, in case my adjutant should come in, by telling him that I have gone to be shaved by your rival scross | Nagasaki the street. I am the Archduke Joseph." The Archduke, who is Commander-in-Chief of the Hungarian Landwehr, and who ought to be pratty well known by sight even, in the Tyrol | Manile

then lifted his hat and departed. It is calculated that quite a million dollars will be expended during the prosidential campaign in the United States on oratory alone. Speakers who give their services for nothing are the fewest; even sensiors and congressmen are not above earning as honest penny in this way. The rate of remuneration varies, not according to the oratorical abilities of the speakers but the number of votes they are supposed to be sole to control. Thus it is understood that Henry Li tometor George, who is rightly credited with a large in- 1, inperators fluence over the labour vote, is to receive £100 Liomidity for every speech he makes on behalf of the Democratic candidate; whereas Daniel Dougherty, who is vastly his superior as an orator, and is perhaps the most brilliant speaker whom the Democrats possess but who is not particularly identified with any section of the voting body. will probably have to content himself with about half that amount, which is the average retribution of a really good speaker. The most remarkable figure on the stump this autumn will be Mrs. Anna Dickinson. She is engaged to make four appearances a week for Harrison and

Morton, and will be paid £40 for each speech she
